*Claim Rejections - 35 USC § 103*

1. Claims 10-12,14,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bartelt et al (4,895,154) in view of Harris (4,813,418).

See previous office action.

2. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bartelt and Harris and further in view of Axelgaard (6,745,082) and Price (6,141,575).

See previous office action.

*Allowable Subject Matter*

3. Claims 1-9,16-20 are allowed.

The remarks made by applicant have been considered, however the above rejections are still deemed proper. Re claim 10, the particular intended use of the device does not materially alter the structural characteristics of the device. That is, the *structure* of the device set forth in claim 10 is considered to be obvious over the *structure* of the combination of patents above. Re claim 13, the overlay of Price could secure the electrodes once they were properly positioned on the patient. Further, the first and second electrodes of claim 13 include an adhesive layer, which, like the electrode of Axelgaard, serve to adhere the electrodes to the patient's skin.

In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
